I had played the board game once with some friends, and really enjoyed it. Unfortunately, no one I am around regularly was interested in playing, so I waited, like Connor McCloud, until the time of the Gathering, when versions were finally created for the PC and the iPad. I've only played for an hour, but the AI seems to be tuned for the varying levels, and is fairly nimble. I may have missed this feature, but a readily available "ghost laser" you could turn off and on while you learn would accelerate becoming accustomed to the pieces and their angle of reflection. I am really pleased with this game. I feel like I am getting the gameboard experience I wanted, and with online multiplayer, I now have people to play it with.

Thanks Devs!. OMG. Memories. One of the first games I ever played was Boulder Dash on my older brothers C64. Later we played together on the much improved Amiga version of the game. Many years ago I found the PC clone Diamond Caves, but lost it again. Today I found it here on Steam and right now my own kids are playing around with the game and designing levels for each other. This is a new version with many new features but it still very true to the original. Well designed, and well implemented.. This game is AMAZING with its non-pixelated 2D air combat.

The controls are VERY cooperative and easy to use

i like it, you like it too.. Polandball Can into space!

Yuo Nevur tough it dit yuo?

<3. This was a solid experience, but could use some improvements. But as others have said, don't go into it expecting "gameplay". You basically can roam around a couple environments, and interact with a few objects (i.e. fire cannons).

Positives:

- Great Graphics/Visuals

- Several Interesting and unexpected interactions

- Boobies

Negatives:

- Needs further optimization. i5 4690K and R9 390 were not enough to be completely judder free in all areas. Island was especially bad.

- \$10 seems steep for the lack of replay value

- Controls could be improved, and maybe add a pause menu with controls listed.. Do I recommend this DLC? If it's on sale, but if you like the characters it includes, buy it. This DLC includes my favourite Hero, that is Hawkeye, Classic Hawkeye. While the others are really good, Dark Phoenix is the one that has the best abilities.. the worst of the series

quot;Combat was nothing more than shooting a pistol at glitchy zombies that couldn't decide whether they wanted to be 2D or 3D. They did have some level of pathing, although they continued to run into the fence in a vain hope that maybe they would hack through and surprise me. What actually happened was they became easy targets."

Edit: Updated URL. A fun little adventure platformer with a hilarious purple blob. Great variety in the levels, and you'll get a good amount of gameplay out of it. Highly recommended.. Beautiful, immersive and interesting. Brilliant game 10/10.. no one on line i buy this for 9\$ not wrht it to buy.. Sweet sequel to AquaNox and Archymedian Dynasty. Abuses video cards for breakfast, poor voiceover countered by sweet everything.. Music is amazing and the gameplay is enjoyable.. Great game, but now the game is dead that I question why it is still on steam. No one plays anymore but I did play during when it was first released and it was very enjoyable. DO NOT BUY UNTIL ALIVE. The only way for the devloper to save the game would be putting the game out for free now, the entry bar was just way to high. \$10 dollars to buy this game on a game that depends on how many people enter? No thanks... So disappointed in what a great potential game it was but the devloper just given up on it because the money was just not there.. This game is pure perfection. The only thing it needs is more tracks or a beatmap creator.
